Know Your Steamer/Rice Cooker

Caution

Be sure to observe the following to prevent malfunction that may cause an accident:

- 1** Measure the quantity of rice and water according to the Instructions on pages 11 - 12.
- 2** Clean the Steamer/Rice Cooker, particularly the condensation collector, after each use (see Care & Cleaning section of this manual).
- 3** Set the unit on a stable, level surface.
- 4** DO NOT expose to water, high humidity, or heat sources. DO NOT use the pot directly on an open flame.
- 5** Be sure to keep the unit out of the reach of children.
- 6** Keep holes that drain into the condensation collector clean and free of debris.
- 7** Cooking with the switch in KEEP WARM position will cause low heat cooking and this will not cook the rice properly.
- 8** The unit becomes hot when in use. DO NOT touch the Lids, Trays or Rice Cooker Body while in use. Do not place your face or hand directly over the steam coming from the cooker.
- 9** Always keep the outside bottom of the pot and the heating plate clean and dry. Any foreign matter between them will cause the unit to malfunction.
- 10** DO NOT tilt the Steamer/Rice Cooker on its edge or place it upside down with its power supply plug connected or with food in the pot as this may cause damage to the cooker or injury to yourself. When tilting or placing the Steamer/Rice Cooker upside down, make sure to disconnect the power supply plug.

Caution

- 11** Do not fill the unit above the MAXIMUM CUP MARKING.
- 12** The lid must be closed tightly in the latched position at all times during cooking. (i.e. The unit must not be operated with the lid opened).
- 13** DO NOT cover the lid with a cloth. The lid may deform or change color.
- 14** DO NOT damage the power cord and do not attempt to repair it if it is damaged.
- 15** Never attempt to customize the cord. Keep the cord away from high temperatures. Avoid unnecessary bending, twisting and pulling on the cord. Never place heavy objects on the cord or attempt to tie it up. Using a damaged power cord can lead to electrical shock, shorting or fire.
- 16** Ensure that the plug fits all the way into the outlet, partially plugged-in cords may cause electric hazard.
- 17** DO NOT MOVE the unit while cooking.
- 18** Use only 2 steaming trays during the same cooking cycle with the Rice Cooker function to ensure best cooking results.
- 19** Your Steamer/Rice Cooker can steam foods and cook rice simultaneously, however, when cooking rice and steaming at the same time, do not exceed two steaming trays (including the inner tray). If not cooking rice or other foods in the inner pot then all three trays can be used for steaming at the same time. As a general rule, use one cup of water per tray when steaming. If using all three trays, you would fill the inner pot with 3 cups of water and depress the COOK button.

Removing the Detachable Lid

Figure 1

Figure 2

Figure 3

Figure 4

- 1 To remove the Detachable Lid, first remove the Condensation Collector located under the Lid hinge by pulling it away from the Steamer/Rice Cooker Housing. See Figure 1.

- 3 Do not attempt to remove the Inner Lid or silicone gasket. See Figure 5. Do not place the Removable Lid in the dishwasher. Simply wash the Inner Lid with warm soapy water and rinse thoroughly.
- 4 If needed, the Condensation Valve can be removed in order to rinse the steam vent. To remove the inner condensation valve, turn it counter-clockwise and lift straight up. See Figure 3.

Figure 5

Attaching the Detachable Lid

CAUTION: Ensure that your Lid Stem is locked in place by attempting to remove it by pulling straight up. A Serious burn injury can occur if you try to move your Steamer/Rice Cooker without the Lid locked into place.
- 2 Replace the Condensation Collector by pressing straight in over the Lid Stem until snaps into place.

Placing the Steaming Trays

Figure 3

Figure 4

Your Wolfgang Puck Steamer / Rice Cooker comes with 3 steaming trays, two with side handles that stack on top of the Rice Cooker, and one internal tray with no side handles that will nest directly inside the Rice Cooker Pot. Simply place the Inner Rice Cooker Pot inside the rice cooker, and add 1 cup of water per steaming tray used. Take the Inner Steaming Tray (see Figure 3) and nest it inside the Rice Cooker Pot. Then place the desired number of external trays on top (see Figure 4) followed by the Glass Lid.

Using Your Steamer/Rice Cooker to Cook Rice

- 1 Only measure rice with the enclosed measuring cup. For best results rinse measured rice until the water becomes relatively clear (see “Helpful Hints” section for details).
- 2 Place rinsed rice in the pot, add water. For 7 cups of uncooked rice (yields 14 cups of cooked rice), measure 7 full scoops of rice, using the rice measure included with your unit. Add to the Steamer/Rice Cooker Pot.
- 3 Add water to the 7 cup line on the inside of the pot. Always add the rice to the pot BEFORE adding the water to the pot. The water level marked on the inner pot is based upon having rice added already.
- 4 Place the pot in the Steamer/Rice Cooker.
- 5 Close the outer lid. The lid is properly closed when it clicks.
- 6 Plug in and immediately press the switch down to “Cook”. The “Cook” indicator light will illuminate to indicate the rice is cooking.
- 7 The Steamer/Rice Cooker will automatically switch to “Keep Warm” when the cooking process has completed. The Keep Warm function will continue until the unit is unplugged.
- 8 Open the Steamer/Rice Cooker by pressing the release button on the handle. Be sure to open the lid facing away from you to avoid any hot steam.
- 9 Remove and clean the condensation collector after every use.

Using Your Steaming Trays

Using the Inner Tray only

- 1 Pour 1 cup of water into the Inner Pot.
- 2 Place Inner Pot in the Rice Cooker Housing and place the Inner Steaming Tray inside the pot.
- 3 Add ingredients to Steaming Tray (see “Steaming Chart” in this manual for suggested cooking times).
- 4 When using the Inner Steaming Tray it is not necessary to use the Glass Lid, simply use the Rice Cooker Lid. The Lid is properly closed when it clicks.
- 5 Plug in and immediately press the switch down to “COOK”. The “COOK” indicator light will illuminate to indicate that the steaming process has started.
- 6 Time the cooking manually as the unit will automatically switch to “KEEP WARM” should the water evaporate.

Using Multiple Trays

When using more than one tray to steam you must use the Glass Lid that comes with your steamer.

- 1 Place 1 cup of water into the Inner Pot for each Steaming Tray used. For example, if using all three trays (1 inner that nests inside the rice pot, and two stacking) place 3 cups of water into the inner pot.
- 2 Add ingredients to Steaming Trays (see “Steaming Chart” in this manual for suggested cooking times). Place the ingredients with the least amount of cooking time required on top and place the Glass Lid on the tray.
- 3 Plug in and immediately press the switch down to “COOK”. The “COOK” indicator light will illuminate to indicate steaming process has started.
- 4 Time the cooking manually as the unit will automatically switch to “KEEP WARM” should the water evaporate.

Steaming is one of the oldest ways to cook foods. It has been around for many thousands of years and is both healthful and economical. Steamed fruits and vegetables are highly regarded among chefs for their color, texture and flavors that are far superior to other cooking methods such as boiling or blanching. This is because steaming is a very gentle way to cooking.

Helpful Hints

- Using the Keep Warm function for more than 5 hours may cause discoloration or an odor in the rice.
- You can adjust the amount of water and/or rice to your own taste preferences.
- When steaming vegetables please reference the steaming chart in this manual. The charts are merely a guide, you may wish to adjust the times according to your own taste preferences.

Washing Rice

When rice is milled some bran and residues adhere to the surface of the rice. You can remove these residues by first washing the rice with water before cooking. This will remove excess starch & residues, which will provide you with much whiter, fluffier rice.

Remember to always use the measuring cup provided to accurately measure the rice. Add the desired amount of rice to the Steamer/Rice Cooker inner pot. Fill with cold water until all of the rice is submerged. Wash the rice by simply stirring the rice around in the water and rubbing between your hands. You will notice that the color of the water will become cloudy as the rice is cleaned. Without spilling the rice tip the inner pot to remove the cloudy water and repeat several times until the water remains clear.

Cooking other types of rice

Your Wolfgang Puck Steamer/Rice Cooker can handle a wide variety of rice such as long grain rice, wild rice, yellow rice, brown rice, basmati rice, etc. When cooking rice other than short grain white rice it will be necessary to increase the amount of water by 1.5 - 2 times more than the standard short grain white rice recipe. Adjust to suit your own personal taste.

A note about the measuring cup provided with your Steamer/Rice Cooker

Your Steamer/Rice Cooker is able to cook a maximum of 7 cups of raw rice, which is the equivalent of 12 cups of cooked rice. A rice cooker cup is equivalent to 6 ounces, or approx 3/4 of a cup. This is why it is important to use the measuring cup that comes with your Steamer/Rice Cooker and not a standard 8-ounce cup measure.

Helpful Hints cont.

- If the Steamer/Rice Cooker switches to KEEP WARM before the food is done, you probably need to add more liquid.
- Foods that are overly sweet or oily can cause the Steamer/Rice Cooker to switch to KEEP WARM earlier than desired. If this happens, add some liquid like water, wine, stock, milk or juice.
- When baking in the Steamer/Rice Cooker, it is usually necessary to push COOK more than once. You will need to wait for about 10 minutes after the machine switches to KEEP WARM to be able to press it back to COOK. This is normal.
- The temperature of the KEEP WARM setting is a little over 180 degrees. This is hot enough to very gently cook foods and far too hot for any bacteria to grow or for food to spoil. It is very safe to keep foods at this setting for several hours.
- Do not double recipes in the Steamer/Rice Cooker. The tightly closed lid will force excess liquid out of the steam vent if you do.
- Use only 2 steaming trays during the same cooking cycle with the Rice Cooker function to ensure best cooking results.

Care & Cleaning

- 1 DO NOT immerse the Steamer/Rice Cooker in water.
- 2 Clean the Steamer/Rice Cooker Housing with a damp cloth. DO NOT use abrasive cleaners as this would scratch the surface of the Housing.
- 3 Wash the Steamer/Rice Cooker Pot, Lid, Steaming Trays, Measuring Cup, Scoop and Condensation Collector in warm soapy water.

Raspberry White Chocolate Bread Pudding

Makes 4 Servings

INGREDIENTS

- 2 1/2 cups heavy cream
- 3/4 cup sugar
- 4 whole eggs
- 1/2 teaspoon kosher salt or 1/4 teaspoon regular salt
- 1 teaspoon fresh lemon juice
- 1 teaspoon pure vanilla, best quality you can find

- 2 Press COOK. When Steamer/Rice Cooker switches to KEEP WARM, open the lid and gently stir the bread pudding. It will be set around the sides and bottom but the center will still be liquid. Close and press COOK. Repeat if necessary.
- 3 Open lid and scatter the raspberries and chocolate pieces over the bread pudding and gently stir them in. Close and leave on KEEP WARM until chocolate is melted and custard is set. Serve hot or warm with raspberry sauce and softly whipped cream.

Chocolate Crazy Cake

This is a recipe I grew up with. It just happens to be a Vegan recipe. It is very easy to mix and is moist and delicious. I love recipes that use simple pantry items! It is amazing how well the Steamer/Rice Cooker bakes cakes. Try it with your favorite recipe or a boxed mix. Bake no more than 3 cups of batter per batch.

Makes 4 - 6 Servings

INGREDIENTS

- 1 1/2 cups all-purpose flour
- 3/4 cup granulated sugar
- 3 tablespoons good-quality unsweetened cocoa powder
- 1 teaspoon baking soda
- 1/2 teaspoon kosher salt or 1/4 teaspoon iodized salt
- 1 teaspoon pure vanilla extract
- 1/4 cup vegetable oil
- 1 cup water
- 1 tablespoon white, cider or wine vinegar

METHOD

- 1** Pour all ingredients into (ungreased) Steamer/Rice Cooker Pot. Stir until combined. A few lumps will remain and batter will be quite thin.
- 2** Close lid and press COOK. After a few minutes, the Steamer/Rice Cooker will switch to KEEP WARM even though the cake is not done. This is normal. Keep Steamer/Rice Cooker on KEEP WARM setting for about 10 minutes, and then press COOK again. The cooker will switch to KEEP WARM again but this is okay. After 30 minutes or so, open and check cake with a toothpick. When inserted slightly off-center and then removed, moist crumbs should cling to the toothpick.
- 3** Remove with potholders and invert onto serving plate. Wipe out Steamer/Rice Cooker Pot and make glaze in it (recipe follows).

Chocolate Glaze for Crazy Cake

This is such an easy recipe. It uses simple pantry staples and tastes so good. I use it for an ice cream topping, as a filling for cookies, and a topping for waffles and even cream puffs.

Makes 1 cup

INGREDIENTS

- 3/4 cup granulated sugar
- 1/4 cup water
- 2 tablespoons cocoa powder
- 1 tablespoon vegetable oil
- 1 teaspoon pure vanilla extract
- small pinch kosher salt or very small pinch iodized salt

METHOD

- 1** Combine all ingredients in Steamer/Rice Cooker Pot. Press COOK. Do not close the lid.
- 2** When mixture comes to a full boil, unplug pot and carefully remove Steamer/Rice Cooker Pot, using potholders. Pour hot glaze over Crazy Cake. Serve warm.

Rice Pudding

This recipe, along with the macaroni and cheese recipe, are the favorites of everyone at the studio when we air the Steamer/Rice Cooker! With Wolfgang, the cameramen and backstage hands all fighting for it when we roll off air, the pot practically cleans itself! This recipe gets the most phone calls when we are on-air. I think it is because warm rice pudding is such a homey comfort food

Makes 3 - 4 Servings

INGREDIENTS

2 cups cooked rice
1 cup heavy cream
1 cup water
1/3 cup sugar
1/2 teaspoon kosher salt
1 teaspoon lemon juice
1 teaspoon excellent vanilla extract
1/4 cup dried fruit, if desired

METHOD

- 1 Stir all ingredients together in Steamer/Rice Cooker and press COOK.
- 2 Stir occasionally. It will be ready to eat in 15 minutes. Serve with Raspberry Coulis (see recipe next page).

Steamed Lemon Cup Custard

Makes 1 Serving

INGREDIENTS

1/2 cup heavy cream
2 tablespoons sugar
1 egg
1 egg yolk
1 teaspoon fresh lemon juice
Zest from 1/2 lemon

METHOD

- 1 Whisk all ingredients together and pour into a buttered ramekin. Cover top with a piece of aluminum foil.
- 2 Add 2 cups hot tap water to bottom of Steamer/Rice Cooker. Place steamer tray on top and place ramekin in tray.
- 3 Close lid and press COOK. Set timer for 20 minutes.
- 4 When time is up, check custard. It should be set but still very wobbly in the center. It is important to use a timer as custards are easily overcooked.

Note: The flavor of this recipe can easily be changed. For vanilla, omit lemon and add 1 teaspoon pure vanilla extract. For coffee, omit lemon and add 1 teaspoon instant coffee. For ginger, omit lemon and add 1 teaspoon grated fresh ginger.

Steamer/Rice Cooker Cakes

Makes 1 Cake

INGREDIENTS

1 store-bought cake mix, any flavor,
Additional ingredients listed on back of cake mix packaging
Non-stick cooking spray

METHOD

- 1 Mix cake ingredients together according to package directions. Spray Steamer/Rice Cooker Pot with nonstick spray.
- 2 Add 3-4 cups of batter, close lid and press COOK. After 10 minutes check cooker. It will probably be on KEEP WARM. If it is press, COOK again. If it will not stay in the COOK position, wait a few minutes and then press COOK again. You will need to repeat this process one more time, so that you will have pressed the COOK button and allowed the appliance to cycle through 3 times.
- 3 Most cakes take about 45 minutes to cook. Test for doneness by inserting a toothpick off center into the cake. The pick should have a few moist crumbs clinging to it. If it has a streak of wet-looking batter on it, press COOK again. It is very difficult to burn anything in the Steamer/Rice Cooker!

NOTE: You can bake all kinds of things in your Steamer/Rice Cooker from corn bread to cobbler using these same baking guidelines!
