## IMPORTANT SAFEGUARDS

When using pressure cookers, basic safety precautions should always be followed:

- 1 Read all instructions carefully.
- 2 Do not touch hot surfaces. Use handles or knobs and a potholder.
- 3 Do not close or clog the safety valves under any circumstance.
- 4 To protect against risk of electrical shock, do not put power cord, plug or body of the appliance in water or other liquid.
- 5 Close supervision is necessary when any appliance is used by or near children.
- 6 Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts.
- 7 Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or is dropped or damaged in any manner. Return the appliance to an authorized service facility for examination, repair, or electrical or mechanical adjustment.
- 8 Do not fill the unit over 2/3 full. When cooking foods that expand during cooking such as rice or dried vegetables, do not fill the unit over 1/2 full. Over filling may cause a risk of clogging the vent pipe and developing excess pressure. See "Using Your Pressure Cooker" section of this manual.
- 9 Be aware that certain foods, such as applesauce, cranberries, pearl barley, oatmeal or other cereals, split peas, noodles, macaroni, rhubarb, or spaghetti can foam, froth, and sputter, and clog the pressure release device (steam vent). These foods should not be cooked in a pressure cooker.
- 10 The use of attachments not recommended or sold by the appliance manufacturer may cause fire, electric shock, or injury.
- 11 Do not use outdoors.
- 12 Do not place the appliance on or near hot gas or electric burners, or in a heated oven.
- 13 Do not let cord hang over edge of table or counter or touch hot surfaces, including the stove.
- 14 Extreme caution must be used when moving an appliance containing hot contents or liquids.
- 15 This appliance cooks under pressure. Improper use may result in scalding injury. Make certain unit is properly closed before operating. See "Using Your Pressure Cooker" section of this manual.
- 16 Do not use this appliance for other than intended use.
- 17 To reduce the risk or electric shock, cook only in removable container.
- 18 Always attach power cord to appliance first, and then plug cord into wall outlet. To disconnect, turn unit off, grasp plug, and pull from the wall. Never yank on cord.
- 19 Always check the pressure release devices for clogging before use.

- 20 Do not open the pressure cooker until has cooled and internal pressure has been released. If the lid is difficult to open, this indicates that the cooker is still pressurized - do not force it open. Any pressure in the cooker can be hazardous. See "Using Your Pressure Cooker" section of this manual.
- 21 Do not operate this appliance in the presence of explosives and/or flammable fumes.
- 22 Do not use pressure cooking for pressure frying with oil.

## SAVE THESE INSTRUCTIONS HOUSEHOLD USE ONLY

**GROUNDING INSTRUCTIONS:** This appliance must be grounded. It is equipped with a 3-prong cord having a grounded plug. The plug must be plugged into an outlet which is properly installed and grounded.

**Warning:** Improper use of the grounded cord can result in the risk of electric shock. Consult a qualified electrician if necessary. Do not attempt to defeat this safety feature by modifying plug.

A short power-supply cord is provided to reduce the hazards resulting from entanglement or tripping over a longer cord. If it is necessary to use an extension cord, it should be positioned such that it does not drape over the counter or tabletop where it can be pulled on by children or tripped over and:

- A. Use only 3-prong extension cord with 3-blade grounding plug.
- B. The marked rating of the extension cord must be equal to or greater than the rating of this appliance. The electrical rating is listed on the bottom of this unit.

## Before Your First Use

Carefully unpack the pressure cooker and parts, and remove all packaging materials. Wash the removable cooking pot, lids and gasket in warm, soapy water to remove any dust that may have accumulated during packaging. Wipe cord and pressure cooker housing with a dry cloth. Do not immerse the cord or plug in water or other liquid.

## Additional Safety Information

- Do not use the pressure cooker without liquid; this could damage the pressure cooker severely.
- Do not use pressure cooker for storage purposes nor insert any utensils.

## About Pressure Cooking

Pressure cooking is an ideal way to make fast, tasty meals for your family! This method of cooking makes it easy for even the busiest cooks to prepare meals from scratch. Use your pressure cooker for fish, chicken, fresh vegetables, rice, legumes, and even dessert – and everything can be cooked to perfection in minutes. The pressure cooker will save you time, energy and money, as well as valuable nutrients. Boiling liquid inside the tightly sealed pot produces steam, which is trapped inside to create pressure. The very hot temperature produced reduces cooking time. The steam helps break down the fibers of whatever you're cooking and infuse the food with flavors. This also captures all of the water-soluble nutrients, making the food higher in flavor and more nutritious than with conventional cooking methods.

## Additional Safety Tips

- Always keep hands and face away from Pressure Release Device when reducing pressure.
- Use extreme caution when removing lid after cooking. Always tilt the lid away from you, so any remaining steam is blocked from your face.
- Never attempt to open lid while cooking, or before pressure indicator has dropped. Do not attempt to defeat this safety feature by forcing it.
- Do not cover or block the pressure valves.
- Do not touch the pot or lid except for the handle immediately after using.
- To avoid burns, allow food to cool before tasting. The temperature of the food gets considerably hotter than with conventional cooking.

## Using Your Pressure Cooker

- 1 Gather all ingredients and be familiar with your recipe. Pour required amount of liquid into removable cooking pot, then add food. Use the cooking rack, if desired. **Except when cooking rice, never load cooker above the maximum ingredient level line marked "2/3 MAX PC" on cooking pot. Foods that expand while cooking (i.e. legumes) should never go above the 3/5 mark.** See instructions for cooking rice on page 11.
- 2 Make sure gasket is securely positioned in the inner lid. Always examine the gasket before installing and before each use. Make sure it is in good working order and free of any tears.
- 3 Secure lid on pressure cooker by grasping the handle and twisting clockwise to lock in place.
- 4 Set the Pressure Release Device to the SEAL position. (See Figure 1).
- 5 Plug power cord into unit first and then into a 120-volt 60 Hz AC only outlet.
- 6 Press the round ON/OFF button once. The display will flash.
- 7 Press the FUNCTION button until desired cooking function is displayed. The pressure cooker will begin to heat and reach pressure. The HEAT light will illuminate. Once pressure has been achieved, pressure will automatically be maintained. Cooking time begins at this point, and the time will begin counting down in the display.
- 8 After pressure cooking is complete, pressure can be released manually or on its own. If a recipe states "let pressure drop on its own," press the ON/OFF button and unplug the cooker. When recipe states "reduce pressure at once" or "reduce pressure manually", turn the Pressure Release Device to the VENT position to release steam and reduce pressure. (See Figure 2). Use caution when manually releasing pressure as hot steam will be released. It is not recommended to release steam manually with recipes containing lots of liquid, such as soups and stews.
- 9 Pressure is completely reduced when the Steam Release Dial is in the Vent position, (see Figure 2) and you no longer hear steam escaping from the valve, and the lid opens freely with no force. Only then is it safe to remove pressure cooker lid and serve food. Remove lid by grasping the handle and twisting lid counter-clockwise. As a safety feature, the lid will not open unless all pressure is reduced. **DO NOT** force the lid open if it does not open freely, this means that the unit is still under pressure.

## Using Your Pressure Cooker (cont.)

Adding Time	After selecting the desired cooking function, you can add cooking time by pressing the TIME button until total cooking time is displayed. You can set total cooking time from 5 minutes up to 120 minutes for Rice, Meat, Vegetable, Soup and Stew.
Delaying Time	After selecting the desired cooking function, you can delay the start time for up to 9 hours by pressing DELAY TIME until total delay time is displayed. Countdown will begin once colon starts flashing.
Keep Warm/Cancel	When pressure cooking is complete, the pressure cooker will automatically switch to Keep Warm. The WARM indicator light will illuminate. To manually switch to Keep Warm and/or cancel any cooking process, press the Keep Warm/Cancel button. The maximum Keep Warm time is 4 hours.
Cooking Pot Markings	Inside the removable cooking pot are two sets of markings. One side is marked "2/3 MAX PC", which indicates the maximum fill line when cooking any food, other than rice in the pressure cooker. The other side has markings for cooking rice. When pressure cooking rice, never fill the pressure cooker more than 1/2 full. To cook rice greater than 1/2 full, utilize the glass lid and not the pressure cooking lid.

## Using Your Pressure Cooker (cont.)

Preparing White Rice	When measuring rice, <b>ONLY USE THE RICE MEASURE CUP PROVIDED; DO NOT USE A STANDARD MEASURING CUP.</b> Use the Rice Measure Cup, along with the pot markings to make perfect rice every time. For example, when making 6 cups rice, use 6 rice cup measures of rice and fill with water to the "6" mark. When pressure cooking rice, do not go past the 6-cup "RC" marking, as indicated on the inside of the removable cooking pot. The combined volume of rice and water must not exceed the 6-cup marking as shown under "RC" markings on the inside of the removable cooking pot. If you desire a greater volume of rice, follow the recommended water-to-rice ratio and use the glass lid, select Rice, and cook for 30-40 minutes. Check for doneness after 30 minutes. Do not use the rice cooker timer as the timer is only applicable when cooking under pressure. Since you are using the glass lid and <i>not</i> the pressure lid, you must use a separate timer.  As a general rule, when cooking 2 cups (or below) of uncooked rice, use 1 tablespoon of butter or oil. For measurements greater than 2 cups, use 2 tablespoons of butter or oil. This will prevent foaming during the cooking process.
----------------------	---

## Helpful Hints

- Read this manual thoroughly and follow all recommendations.
- Be familiar with the recipe and have all ingredients ready before you begin.
- Be sure the lid is secured properly before beginning.
- You may wish to brown some meats before cooking with other ingredients. To do so, select any cooking function and preheat pressure cooker without lid. Add oil and brown meat. Do not cover when browning.
- Cut foods into uniform-size pieces to promote even cooking. In recipes that call for various ingredients, cut those that cook more quickly into larger pieces and those that cook more slowly into smaller pieces.
- Many different cooking liquids can be used in a pressure cooker: wine, beer, bouillon, fruit juices, water and more.
- After becoming familiar with your pressure cooker, you can convert conventional recipes for pressure cooking. In general, reduce cooking times by two thirds. The amount of liquid used may also have to be adjusted because there is very little evaporation from the pressure cooker. Reduce the amount of liquid so there is only about 1/2 cup more than desired in the finished product. Remember, however, there must always be some liquid in the pressure cooker to form the necessary steam. Try this formula ; 1 cup of liquid for the first 15 minutes of pressure cooking then 1/3 cup of liquid for each subsequent 15 minutes.
- Since flavors are more concentrated, reduce amounts of herbs and seasonings when converting conventional recipes. Fresh herbs are better for pressure cooking than dried herbs.
- Generally speaking, pressure cookers cook foods in about 1/3 the time of conventional cooking methods.
- Increase cooking times by about ten percent when cooking in high altitudes over 3,500 feet.
- If you wish to cook food for less time than the pre-programmed amount, watch the timer and press CANCEL when desired cooking time has elapsed.
- When you are using frozen meats in your recipes, the cooking time does not need to be altered. Pressure will not be achieved until the internal temperature in the pot is 40 degrees higher than the boiling point of water. The cooking time will not begin until pressure is achieved; it will just take longer to come to pressure.
- Always check to make sure your gasket and float valve are clean and in good working order.

## Helpful Hints (cont.)

- Remember if you are not using the basket while pressure cooking the liquid will flavor what you are cooking. Try using fresh herbs or aromatic vegetables like onions or garlic, wine or stock. The flavor transference will be wonderful.
- Do not attempt to boil pasta with pressure lid on; the foam can clog the pressure valve.
- When cooking under pressure, never fill above the fill line of PC markings. If you are making soup and you are at the fill line, do not release pressure manually because hot liquid could spurt out.
- Never attempt to open lid while under pressure!!! Always open pressure cooker with the lid facing away from you.
- When releasing steam manually, evaporation of some liquid may occur (i.e. when making rice or risotto). This is normal, but caution must be used to prevent injury.

## Care & Cleaning

- 1 Allow pressure cooker to cool completely before cleaning. Unplug the power cord from the outlet and then from the pressure cooker.
- 2 Wash the pressure cooker removable pot, sealing gasket and lids by hand with warm, soapy water. Dry all parts thoroughly. (See Figure 1 for removing and installing sealing gasket).
- 3 If necessary, wipe the power cord clean with a damp cloth. Dry thoroughly. Never immerse the power cord or plug.
- 4 Replace sealing gasket securely in lid. After each use, check gasket for any tears and make sure the pressure regulator dial and valve are in good working order. Also remove the anti-blockage cover, steam release dial, and clean the steam vent thoroughly (See Figure 2). Ensure that there are no food particles or any other foreign matter are blocking the steam vents prior to putting the anti-blockage cover and steam release dial back on the lid. The anti-blockage cover helps prevent food particles from entering Steam Release Valve.  
**You must ensure that this is cleaned after each use. It is important to check the steam vent thoroughly and use a narrow utensil, if necessary, to poke through the steam vent and ensure that it is clear and that no food particles adhere to the walls, thus blocking the steam from being able to be freely released.**
- 5 Do not store pressure cooker with lid locked in place. If you store the lid locked onto the pressure cooker it will reduce the life of the gasket since it will stay compressed during non-use.

## Spiced Caramelized Pecans

*Makes 2 cups*

### INGREDIENTS

3 cups peanut oil  
2 cups pecan halves  
1 teaspoon kosher salt  
1/2 teaspoon cayenne pepper  
1 cup sifted confectioners' sugar

### METHOD

- 1 In a deep-fryer or a deep pot, heat the oil to 350 degrees F. (A deep-frying thermometer can be clipped to the side of the pan so that you can tell when the proper temperature has been reached).
- 2 Meanwhile, in a large saucepan bring 2 quarts of water to a boil. Add the pecans and boil for 2 minutes. Drain in a large strainer, shaking off all excess water. Sprinkle the salt and cayenne pepper over the nuts and then coat with the confectioners' sugar, a little at a time, allowing the sugar to melt into the pecans. Toss the nuts by shaking the strainer, adding a little more sugar each time, until all the sugar is used and all the nuts are coated. Do not use hands or a spoon to toss. The nuts should have a glaze of sugar.
- 3 Carefully add the nuts to the heated oil, keeping the oil at 350 degrees F. Cook until golden brown, about 3 minutes, stirring occasionally. Remove with a slotted spoon to a baking tray to cool.

## Tortilla Soup

6 - 8 Servings

### INGREDIENTS

2 ears of fresh corn, husks removed  
 4 or 5 large garlic cloves, peeled  
 1 small onion (about 3 ounces), peeled, trimmed and quartered  
 1 small jalapeño pepper, trimmed and seeded  
 2 tablespoons corn oil  
 2 corn tortillas, cut into 1-inch squares  
 2 large ripe tomatoes (1 pound), peeled, seeded, and coarsely chopped  
 2 tablespoons tomato paste  
 2 to 3 teaspoons ground cumin  
 8 cups chicken stock

### Garnish

2 corn tortillas  
 1 ripe avocado  
 1 large chicken breast, cooked, boned, and skinned  
 1/2 cup grated cheddar cheese  
 1/4 cup chopped fresh cilantro leaves

### METHOD

- 1 Using a large knife, carefully scrape the kernels off the cobs and set aside, reserving cobs.
- 2 Using a food processor fitted with the steel blade, or a large knife, coarsely chop the garlic, onion, jalapeño pepper, and corn kernels. Reserve.
- 3 Select Vegetable function. Allow pressure cooker to get hot (a couple of minutes), and add oil. When oil is hot, add tortilla squares. Cook over low heat until slightly crisp. Stir in chopped vegetables and simmer just until vegetables are coated with oil. Do not brown.

## Tortilla Soup (cont.)

- 4 Add tomatoes, tomato paste, and 2 teaspoons of the cumin. Continue to simmer for about 10 minutes to maximize flavor. Slowly pour in the stock and add the corn cobs.
- 5 Lock the lid in place, and set timer for 15 minutes.
- 6 When cooking cycle is complete and all pressure is released, open lid. Discard corn cobs and purée the soup with an immersion blender set on low until desired consistency is reached. Taste for salt, pepper or additional cumin.
- 7 Prepare the garnish: Preheat oven to 350 degrees. Cut tortillas into thin strips and arrange on a small baking tray. Bake until strips are crisp, 10 to 15 minutes. Peel and dice avocado. Cut chicken into thin strips.
- 8 To serve, add chicken and avocado to soup and reheat over low heat. Ladle the soup into 6-8 warm bowls and garnish with the baked tortilla strips, cheddar cheese, and chopped cilantro. Serve immediately.

*Notes: If desired, the soup can be further reduced to intensify flavors. After discarding corn cobs and before puréeing, select Vegetable function again and, with the lid off, reduce soup by one-third.*

*For a very smooth consistency, pass soup through a fine strainer after puréeing.*

## Chocolate Truffle Crème Brulee

6 Servings

### INGREDIENTS

2 cups heavy whipping cream  
 1 cup bittersweet chocolate pieces or chips  
 1/3 cup granulated sugar  
 2 teaspoons excellent quality pure vanilla extract  
 5 large egg yolks

### METHOD

- 1 Heat cream in microwave until very hot, about 2 minutes. Pour hot cream over chocolate pieces in a large bowl. Whisk until chocolate is completely melted.
- 2 Whisk in remaining ingredients. Divide between 6 ramekins.
- 3 Place a folded kitchen towel in bottom of pressure cooker removable pot. Pour in 3 cups water. Place ramekins on towel taking care to keep them level. You may be able stack them all in the pressure cooker by building the ramekins up, pyramid style. If not, cook them in two batches.
- 4 Lock lid in place. Select Rice setting.
- 5 When cooking cycle is complete, allow pressure to release naturally. When all pressure has been released, remove lid, tilting it away from you to avoid steam. Carefully remove ramekins using tongs or potholders.
- 6 Sprinkle an even layer of granulated sugar over tops of each ramekin. Place them on a heatproof surface and burn the tops to a nice amber color using a blowtorch. I do not find that caramelizing the sugar works well under the oven broiler. If you do not have a torch, make the Microwave Caramel recipe on page 55, or omit the caramelized sugar step.

## Creamy Dreamy Rice Pudding

4 - 6 Servings

### INGREDIENTS

2 cups water  
 1 cup rice, such as long grain (my favorite is baby basmati)  
 1 tablespoon unsalted butter (important to control foaming)  
 1/2 teaspoon kosher salt  
 1 split vanilla bean, Tahitian preferred  
 1/2 cups half and half  
 3/4 cups granulated sugar  
 1 teaspoon fresh lemon juice

### METHOD

- 1 Combine water, rice, butter, salt and vanilla bean in cooking pot.
- 2 Lock lid in place. Select Rice setting, but cancel cooking after 5 minutes (1 minute earlier than preset time.)
- 3 When cooking cycle is complete, allow pressure to release naturally. When all pressure has been released, remove lid, tilting it away from you to avoid steam.
4. Add remaining ingredients and stir thoroughly.
- 5 The pudding will be quite runny, but that is how I prefer it since it thickens up considerably as it cools. If you like it thick, select Rice setting again but do not lock on lid. Bring to a full boil and turn off.
- 6 Serve warm. Add dried fruit, fresh fruit, cinnamon or other spices as desired.

## Lively Lemon Cheesecake

4 - 6 Servings

### INGREDIENTS

2 tablespoons unsalted butter, melted  
 1/2 cup vanilla wafer crumbs  
 2 packages (8 ounces each) cream cheese  
 1/2 cup granulated sugar  
 zest and juice from 1 lemon  
 2 large eggs

### METHOD

- 1 Combine butter and wafer crumbs in the bottom of a 6-inch springform pan. Press and flatten to cover bottom. Set aside.
- 2 Combine cream cheese and sugar in food processor. Pulse and scrape down until smooth. Add zest, juice and eggs. Pulse only until no visible egg remains. **Do not over mix.**
- 3 Scrape mixture into prepared pan.
- 4 Place a folded kitchen towel in bottom of pressure cooker removable pot. Pour in 3 cups water. Place springform pan on top of towel.
- 5 Lock lid in place. Select Rice setting, and set timer for 12 minutes.

- 7 Cool until warm and then cover and refrigerate for at least 4 hours or overnight. Serve with lemon slices, crushed lemon drop candies and sweetened whipped cream, if desired.

*Notes: Because of the specialty type of steam cooking, the cheesecake surface will appear lumpy. This is normal and is only on the very surface.*

*The easiest way to slice a cheesecake is with a length of dental floss held taught between your hands.*

## Microwave Caramel

*Makes enough to coat 8 ramekins*

### INGREDIENTS

1/2 cup granulated sugar  
 1/4 cup light corn syrup  
 5 drops fresh lemon juice

### METHOD

- 1 Place all ingredients in a 2- or 4-cup glass measuring cup. Stir until all sugar is moistened.
- 2 Cook in microwave until bubbles start piling up on top of each other and mixture turns amber in color, approximately 3 minutes. The time it takes depends on the wattage of your microwave.
- 3 Carefully remove and divide between ramekins. Use caution; sugar mixture is extremely hot. Let cool until hard.

*Notes: This recipe is a great topping for the Chocolate Truffle Crème Brulee on page 51, if you do not own a blow torch. Simply pour the hot caramel over the top of the cooled brulee and let harden.*

*Extra caramel can be used to make pretty garnishes. Simply pour out in a lacy pattern onto aluminum foil, preferably the nonstick aluminum foil that is now available. Allow to harden and then carefully remove to top ice cream, cakes and other desserts.*

4 Servings

### INGREDIENTS

1 cup granulated sugar  
 4 large eggs  
 1/2 teaspoon kosher salt  
 1 tablespoon fresh lemon juice  
 2 teaspoons excellent quality pure vanilla extract  
 2 cups heavy whipping cream  
 2 tablespoons unsalted butter, melted  
 3 croissants, cut into 2-inch pieces (stale is fine)  
 1/2 cup fresh or frozen raspberries  
 2 tablespoons white chocolate chips

### METHOD

- 1 Spray or grease a 6-cup baking mold or pan. Set aside.
- 2 In a large bowl, whisk together sugar, eggs, salt, lemon juice, vanilla, cream and melted butter. Whisk until sugar is dissolved. Gently fold in croissant pieces.
- 3 Pour one-third of mixture into prepared pan. Scatter a layer of raspberries and white chocolate over mixture. Repeat layers twice.
- 4 Place a folded kitchen towel in bottom of pressure cooker removable pot. Pour in 3 cups water. Place pan of bread pudding on top of towel.
- 5 Lock lid in place. Select Rice setting, and set timer for 11 minutes.
- 6 When cooking cycle is complete, allow pressure to release naturally. When all pressure has been released, remove lid, tilting it away from you to avoid steam. Carefully remove pan of bread pudding, using potholders.
- 7 Serve warm with additional raspberries and slightly sweetened whipped cream, if desired.

## Silky Flan with Microwave Caramel

4 Servings

### INGREDIENTS

1 recipe Microwave Caramel, page 54  
 1 cup whole milk  
 1 cup heavy whipping cream  
 2/3 cup granulated sugar  
 1/8 teaspoon kosher salt  
 1 teaspoon excellent quality pure vanilla extract  
 2 large eggs  
 3 large egg yolks

### METHOD

- 1 Place all ingredients in large mixing bowl and whisk until smooth. Pour mixture over 4 caramel-lined ramekins.
- 2 Place a folded kitchen towel in bowl of pressure cooker removable pot. Pour in 3 cups water. Place ramekins on towel taking care to keep them level.
- 3 Lock lid in place. Select Rice setting, but cancel cooking after 3 minutes (3 minutes earlier than preset time.)
- 4 When cooking cycle is complete, release pressure manually. When all pressure has been released, carefully remove lid, tilting it away from you to avoid steam. Carefully remove ramekins using tongs or potholders.
- 5 Serve warm or cold. Remove flan from ramekin by first running a thin-bladed knife around edge of custard to loosen it. Invert onto serving plate, letting the now liquid caramel dribble over top.
